DATAVOLO | snowflake
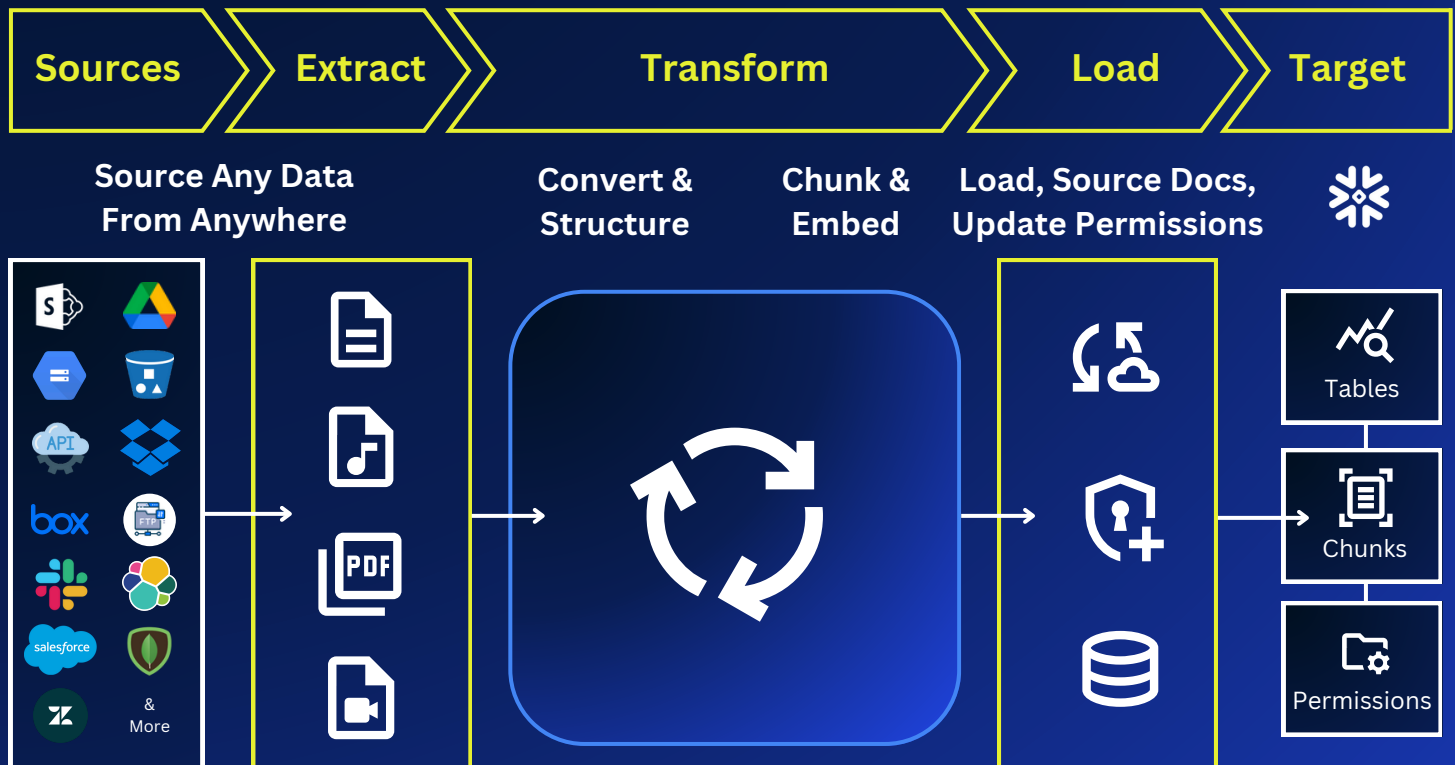

Datavolo provides an end to end multimodal data engineering platform that is *flexible, fast, & secure.*

- Load unstructured data into Snowflake Data Platform
- Synchronize important metadata in near real-time
- Enable users to securely chat with entitled data
- Rapid Customer Success on Cortex AI
- Snowflake Native App using Snowpark Containers
- Runs in your Snowflake Account & Security Boundary

Sources > Extract > Transform > Load > Target

Source Any Data From Anywhere

Convert & Structure **Chunk & Embed**

Load, Source Docs, Update Permissions

Tables

Chunks

Permissions

Features

- Powered by Apache NiFi
- Swap API's, sources, destinations, & models
- Identify doc layouts & extract tabular data
- Quick changes on visual low code platform

Benefits

- Velocity - Build data pipelines with ease
- Lineage - Every event in every pipeline
- Security - Guardrails to secure chatbots
- Quality - Enable effective retrieval with ML powered chunking & metadata
